Summary

Customer-support and operations leader with 5+ years of experience across the customer lifecycle, progressing from frontline support to team leadership. Experienced in building scalable support systems, including a custom API-integrated intake portal, SOPs, QA frameworks, and in-house training programs that improved resolution speed and operational efficiency. Led a 15-member support team and cleared a 500+ daily ticket backlog to zero through process redesign and structured execution. Alongside operations leadership, bring hands-on UI/UX and product design experience, translating customer and operational problems into intuitive digital experiences.

KEY IMPACT — ANVESHAN

- **Drove support operations from a 500+ daily backlog to zero pending**, redesigning workflows to enable real-time issue resolution.
- **Cut first response time by 99%+**, from 45 minutes to 30 seconds across 5,000+ chats in August.
- **Reduced customer queue wait from 2 hours to 1 minute 40 seconds**, improving response accessibility and operational throughput.

Professional Experience

Customer Service Representative,

Globiva — Gurugram, India

08/2021 – 11/2022

- Redesigned the company's mobile application, improving usability, user experience, and interface consistency.
- Conducted comprehensive UX audits across the website and mobile application, identifying opportunities to improve customer journeys and conversion.
- Collaborated with Product, Tech, Marketing, Operations, and Logistics teams to address recurring customer pain points and improve underlying business processes.
- Analyzed customer feedback and support trends, translating customer insights into actionable product, process, and experience improvements.

Team Lead, Anveshan Farm - Gurugram, India

12/2025 – Present

Promoted to Team Lead within 3 months, taking ownership of a 15-member customer support operation and driving process transformation, automation, quality, and cross-functional collaboration.

- Built and led a 15-member omnichannel support team across chat, email/tickets, and voice, establishing team structures, targets, workflows, and shift-wise ownership.
- Built a Voice-of-Customer (VOC) intake portal integrated with Shopify and EasyEcom APIs, reducing issue logging from a lengthy Google Form to under one minute with automated order-data population.
- Redesigned issue-resolution SOPs across key operational workflows, transforming dispatch, packaging, and quality resolutions from 24–72+ hour processes to real-time or same-day resolution, while reducing delivery resolution to a 72-hour SLA through proactive escalation.
- Migrated the complete support operation from BIK to Freshdesk with minimal business disruption, improving ticket management and operational visibility.
- Automated reporting and dashboards using Google Sheets, Apps Script, and APIs, reducing manual effort and enabling faster access to operational insights.
- Built an in-house training and certification portal covering playbooks, assessments, and certifications, alongside a dedicated QA function for audits and quality scoring.

- Developed strong analytical, logical reasoning, and debugging skills through technical projects and coursework.
- Collaborated on team-based projects, strengthening communication, coordination, and problem-solving skills.
- Participated in technical seminars, presentations, and viva sessions, developing the ability to communicate technical concepts effectively.
- Gained an understanding of the end-to-end product development lifecycle, from ideation and development to implementation.

- Redesigned customer-facing policies and workflows, including reducing return/replacement timelines from 5 days to 48 hours, introducing POD timelines, and implementing an issue-based cancellation process.
- Developed two Assistance Team Coaches (ATCs) to manage individual teams and created structured shift rosters mapping agents to operational tasks.
- Partnered cross-functionally with Product, Tech, Operations, Packaging, Warehouse, and Logistics, using customer feedback and UX audits to identify and resolve recurring customer and process pain points.
